Questions for breakout discussion

From where you're coming from, what do you want to see happen in the next 2-5 years?

What is the biggest concern you have with regard to what you heard this morning?

Breakout groups: 6 people/session

- Introduce yourself
- Read your card, respond to clarifying questions
- Identify shared thoughts/concerns
- Each person has 2 unique votes to give to others' ideas
  - Tally the votes each card receives, on the card
- Write down new ideas on new cards

Report-out from breakouts

- Identification != authentication. Getting the world to understand the difference.
  - Separation of concerns: authentication and attribute-provisioning ceremonies
- Privacy. Needs more discussion of privacy concerns and considerations
  - Privacy by design
- Identity assurance. How do you get to trusting the issuer or assurer? Moving from technology to service
- Want browser/device to know who I am and be my agent in revealing that
- Bridging WebAuthn and OAuth
- RPs have a rich choice of federation, and user-access to those
  - Also data storage
- Coexistence, not choosing between paradigms. Discovery, registration, resolution.

- Align WebAuthn and DIDs for unified experience
  - Reuse mature standards
- Industry adoption of DID-based identities
- What does interop mean for DIDs?
- DID WG formed at W3C
- Usability
- Selective permissionless delegation
- OpenID Connect community working with Ethereum community re gamification and incentives.
- Value propositions; sub-data flows for business modeling around them
- [missed some, they're captured on the boards up-front]
  - we have cameras and will photograph the boards
